Forward Looking Statement and Explanatory Note

Statements contained in this presentation regarding the growth and prospects of the business, the Company's projected 2026 financial results, long-term objectives and all other statements in this presentation other than recitation of historical facts are forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements involve known and unknown risks, estimates, uncertainties and other factors that may cause actual results to be materially different. Such factors include, but are not limited to, the following: our ability to maintain and expand our products and services; our ability to keep pace with technological and industry developments in artificial intelligence ("AI") and comply with evolving AI regulations; our ability to achieve continued customer renewals and achieve new contract value, backlog and deferred revenue growth in light of competitive pressures; our ability to grow or sustain revenue from individual customers; our ability to expand or retain our customer base; our ability to carry out our strategic initiatives and manage associated costs; the timing of conferences and meetings, in particular our Gartner Symposium/Xpo series; our ability to achieve and effectively manage growth, including our ability to integrate our acquisitions and consummate and integrate future acquisitions; our ability to attract and retain a professional staff of analysts and consultants as well as experienced sales personnel upon whom we are dependent, especially in light of labor competition; our ability to successfully compete with existing competitors and potential new competitors; our ability to enforce and protect our intellectual property rights; the impact of cybersecurity incidents or other disruptions to our information systems; our ability to pay our debt obligations; the impact of global economic and geopolitical conditions, including inflation (and related monetary policy by governments in response to inflation) and recession; uncertain effects, both direct and indirect, of changes and volatility in tariffs and trade policies; risks associated with the creditworthiness, budget cuts, priorities and shutdown of governments and agencies; additional risks associated with international operations, including foreign currency fluctuations; the impact on our business resulting from changes in international conditions, including those resulting from tensions in the Middle East, the war in Ukraine and current and future sanctions imposed by governments or other authorities; the impact of restructuring and other charges on our businesses and operations; our ability to meet sustainability commitments and comply with applicable regulatory requirements, as well as potential reactions by customers to these commitments; the impact of changes in tax policy (including global minimum tax legislation) and heightened scrutiny from various taxing authorities globally; changes to laws and regulations; and other risks and uncertainties described under "Risk Factors" in our most recent Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. Non-GAAP financial measures such as Adj. Revenues, Adj. EBITDA, Adj. EBITDA excluding Divested Operation, Adj. EBITDA Margin, Adj. EBITDA Margin excluding Divested Operation, Adj. Net Income, Adj. EPS, Return on Invested Capital, and Free Cash Flow, as included in this presentation, are supplemental measures that are not calculated in accordance with generally accepted accounting principles in the United States of America ("GAAP"). Definitions of these measures and reconciliations to the most-directly comparable GAAP measures are included in the appendix.

Unless otherwise indicated, or the content otherwise requires, all percentages indicated in this presentation are year-over-year growth rates.

The Company's SEC filings can be found on Gartner's website at investor.gartner.com and on the SEC's website at www.sec.gov. Forward looking statements included herein speak only as of August 4, 2026 and the Company disclaims any obligation to revise or update such statements to reflect events or circumstances after this date or to reflect the occurrence of unanticipated events or circumstances, except as required by applicable law or regulation.

Some totals may not add due to rounding.

CV dollars and CV growth rates have always been and will continue to be presented on an FX Neutral basis. We are now also providing the sequential FX Neutral CV growth rates in addition to the year-over-year growth. These reflect the normal seasonality of the business, in which quarter-to-quarter growth generally increases as the calendar year progresses.

Beginning this quarter, other than FX Neutral CV dollars, all KPIs which are based on FX Neutral calculations will not be revised in future presentations. There is no change to historical numbers as they were originally presented in the past.

For FX Neutral CV dollars, the approach is unchanged from our long-standing method:

- During a given year (for example 2025), all CV dollar amounts will be shown using the 2025 rates.
- In the following year (for example 2026), the 2025 CV dollar amounts will be shown using the 2026 rates.
- The purpose of updating the prior year is to provide the calculation of FX Neutral growth on a suitably comparable basis.

CV Y/Y and sequential growth rates, productivity, CV/enterprise and wallet retention will remain fixed and will be stated at the FX rates at the start of the calendar year to which a metric relates.

Definitions

Adjusted Revenues: Represents GAAP revenues less revenues from our Digital Markets divested operation. We believe Adjusted Revenues is an important measure of our recurring operations as it provides a more accurate period-over period comparison of trends in revenues.

Adjusted EBITDA and Adjusted EBITDA Margin: Represents GAAP net income (loss) adjusted for: (i) interest expense, net; (ii) tax provision (benefit); (iii) gain on event cancellation insurance claims, as applicable; (iv) other (income) expense, net; (v) stock-based compensation expense; (vi) depreciation, amortization, and accretion; (vii) goodwill impairment and other asset impairments, as applicable, (viii) workforce reduction expenses and certain other non-recurring items and (ix) gain/loss on divestitures, as applicable. Adjusted EBITDA Margin represents Adjusted EBITDA divided by GAAP Revenue. We believe Adjusted EBITDA and Adjusted EBITDA Margin are important measures of our recurring operations as they exclude items not representative of our core operating results.

Adjusted EBITDA Excluding Divested Operation and Adjusted EBITDA Margin Excluding Divested Operation: Represents Adjusted EBITDA as defined above less EBITDA from our Digital Markets divested operation. Adjusted EBITDA Margin Excluding Divested Operation represents Adjusted EBITDA Excluding Divested Operation divided by Adjusted Revenue. We believe Adjusted EBITDA Excluding Divested Operation and Adjusted EBITDA Margin Excluding Divested Operation are important measures of our recurring operations as it provides a more accurate and consistent period-over period comparison of our results.

Adjusted Net Income and Adjusted EPS: Represents GAAP net income (loss) and diluted net income (loss) per share adjusted for the impact of certain items directly related to acquisitions and other non-recurring items. These adjustments include (on a per share basis, in the case of Adjusted EPS): (i) the amortization of acquired intangibles*; (ii) workforce reduction expenses and other non-recurring items; (iii) gain on event cancellation insurance claims, as applicable; (iv) the non-cash (gain) loss on de-designated interest rate swaps, as applicable; (v) goodwill impairment and other asset impairments, as applicable, (vi) gain/loss on divestitures, as applicable, and (vii) the related tax impact. We believe Adjusted Net Income and Adjusted EPS are important measures of our recurring operations as they exclude items that may not be indicative of our core operating results.

* The Company excludes amortization of acquired intangibles because it is generally a fixed non-cash expense that can be significantly impacted by the timing and/or size of acquisitions and management does not use it to evaluate core operating results. Although the Company excludes the amortization of acquired intangibles from Adjusted Net Income and Adjusted EPS, management believes that it is important for investors to understand that such intangible assets were recorded as part of acquisition accounting and contribute to revenue generation.

Definitions

Return on Invested Capital: Represents NOPAT divided by Total Capital (Total Debt + Total Stockholders' Equity). We believe that ROIC is an important measure of the invested capital as it measures how effectively we deploy our capital base. ROIC is a profitability measure, not a measure of financial performance under GAAP.

Net Operating Profit After Tax (NOPAT): We define net operating profit after tax as operating income for the trailing twelve months less income taxes calculated using the estimated effective tax rate for that period.

Free Cash Flow: Represents cash provided by operating activities determined in accordance with GAAP less payments for capital expenditures. We believe Free Cash Flow is an important measure of the recurring cash generated by the Company's core operations that may be available to be used to repay debt obligations, repurchase our stock, invest in future growth through new business development activities, or make acquisitions.

Foreign Currency Neutral (FX Neutral): We provide foreign currency neutral dollar amounts and percentages for our contract values, revenues, certain expenses, and other metrics. These foreign currency neutral dollar amounts and percentages eliminate the effects of exchange rate fluctuations and thus provide a more accurate and meaningful trend in the underlying data being measured. We calculate foreign currency neutral dollar amounts by converting the underlying amounts in local currency for different periods into U.S. dollars by applying the same foreign exchange rates to all periods presented.

Definitions of Key Metrics/Calculations

Segment	Business Measurements
Insights	Contract value represents the dollar value attributable to all of our subscription-related contracts. It is calculated as the annualized value of all contracts in effect at a specific point in time, without regard to the duration of the contract. Contract value primarily includes Insights deliverables for which revenue is recognized on a ratable basis, as well as other deliverables (primarily Conferences tickets) for which revenue is recognized when the deliverable is utilized. Comparing contract value year-over-year not only measures the short-term growth of our business, but also signals the long-term health of our Insights subscription business since it measures revenue that is highly likely to recur over a multi-year period. Our contract value consists of Global Technology Sales contract value, which includes sales to users and providers of technology, and Global Business Sales contract value, which includes sales to all other functional leaders.
	Client retention rate represents a measure of client satisfaction and renewed business relationships at a specific point in time. Client retention is calculated on a percentage basis by dividing our current clients, who were also clients a year ago, by all clients from a year ago. Client retention is calculated at an enterprise level, which represents a single company or customer.
	Wallet retention rate represents a measure of the amount of contract value we have retained with clients over a twelve-month period. Wallet retention is calculated on a percentage basis by dividing the contract value of our current clients, who were also clients a year ago, by the contract value from a year ago, excluding the impact of foreign currency exchange. When wallet retention exceeds client retention, it is an indication of retention of higher-spending clients, or increased spending by retained clients, or both. Wallet retention is calculated at an enterprise level, which represents a single company or customer.
Conference	Number of destination conferences represents the total number of hosted in-person conferences completed during the period. Single day, local meetings are excluded.
	Number of destination attendees represents the total number of people who attend in-person conferences. Single day, local meetings are excluded.
Consulting	Consulting backlog represents future revenue to be derived from in-process consulting and benchmark analytics engagements.
	Utilization rate represents a measure of productivity of our consultants. Utilization rates are calculated for billable headcount on a percentage basis by dividing total hours billed by total hours available to bill.
